SOFT OPTIONS

To better accommodate the industry's varied needs Comenda offers both integrated and external water softeners.

Our range of integrated softeners are available only on our Hi-Line and Prime undercounter and hood-type machines, while our external units easily adapt to any washing system thanks to their compact design. No pre-preparation is required to add these units as they connect directly to electrical and water supplies. Functionally, the resins are regenerated only when required, based on the volumetric water usage. Salt refilling is easily done while servicing the unit is effortless.

The choice of water softener depends on how much water is consumed each day. To determine that amount, multiply the machine's rinse consumption per cycle by the number of racks handled per day, and add to the tank volume.

Comenda features five automatic softeners that can manage cold water in volumes ranging from 450 liters to 6,000 liters before requiring regeneration. Consider your options here, but be sure to consult with a Comenda representative to better determine which unit would be the most practical choice for your operation
